

Draw the environment diagram produced by the following code. Also fill in the blank to show what Python would print.

```
>>> def foo():
...     x = 1
...     def bar():
...         x = 2
...         def foo():
...             print(x)
...         return foo, bar
...
>>> def john(eric_k, tom):
...     eric_k()
...     tom()
...
>>> aki, eric_t = foo()
>>> john(aki, eric_t)

_____
>>> aki()
```
